

About NRC

Description

A Trusted and Experienced Global Environmental and Industrial Partner

NRC has been a trusted provider of comprehensive, cost-effective and safety driven solutions to the oil and gas, transportation, chemical, industrial, power and government sectors since 1992.

Already the largest provider of commercial environmental and industrial services, NRC is the only truly global single source provider of spill and high hazard response solutions. Our experienced response teams are in the forefront of managing catastrophic events and absolutely committed to providing cost effective solutions that meet our customer's environmental needs and regulatory obligations, while maintaining the highest safety standards.

In addition to managing large scale response projects and spill events, NRC provides superior and a diverse array of waste management, site remediation, and industrial cleaning services. Whether it be tailoring an operation to achieve waste minimization, containment of soil or groundwater contamination, or remediation of petroleum pipelines, NRC works closely with its clients to achieve their goals in a timely and cost-effective manner.

With the broadest offering of global response and environmental services to over 7000 customers, NRC has a proven track record of delivering end-to-end preparedness, response, and remediation solutions even under the most challenging conditions.

Count on NRC as your single-source global provider for oil spill, High Hazard Emergency, environmental, industrial, firefighting, rescue, consultancy and training services anywhere around the world.

Skilled and Experienced Experts

NRC is a leader in providing our customers with a complete range of innovative environmental solutions to meet the environmental challenges of our industry partners. Our goal is to support the integrity, safety and reliability of our customer's operations. This means ensuring that our expert teams meet all quality and performance requirements while minimizing the environmental impacts to industry.

Uncompromising Commitment to Safety

NRC has an unyielding commitment to maintaining the highest operational and safety standards. Our

personnel undergo rigorous training in environmental and emergency disciplines and all services are delivered to meet a variety of applicable benchmarks including OSHA, NFPA and ANSI.

NRC holds the highest classification for an oil spill response organization offered by the United States Coast Guard and, internationally, we hold ISO certifications, 9001, 14001 and OHSAS 18001 and UK Spill Accreditation.
