**Your Global Provider of Expert Environmental,
Industrial and Emergency Response Solutions**

www.nrcc.com

A Trusted and Experienced Global Environmental and Industrial Partner

NRC has been a trusted provider of comprehensive, cost-effective and safety driven solutions to the oil and gas, transportation, chemical, industrial, power and government sectors since 1992.

The world's largest commercial Oil Spill Response Organization, with the broadest offering of global service to over 7000 customers, NRC has a proven track record of delivering end-to-end preparedness, response, and remediation solutions even under the most challenging conditions.

Count on NRC as your single-source global provider for oil spill, High Hazard Emergency, environmental, industrial, firefighting, rescue, consultancy and training services anywhere around the world.

Our Global Response Services, delivered through our international network currently operating in 13 countries, provides a more effective and cost saving alternative to member-based co-operatives.

And because our plan is based entirely on your needs, costs are predictable, scalable, and significantly lower when compared to those of member-based services.

U.S. and International Coverage from a Single Source Provider

NRC provides emergency and environmental services to more than 15,000 tank and non-tank vessels and an additional 2,000 barges. We cover approximately 700 assorted facilities, refineries and pipelines, as well as railroad companies, power plants and airport fuel farms.

Our experienced response teams are in the forefront of managing catastrophic events and absolutely committed to providing cost effective solutions that meet our customer's environmental needs and regulatory obligations, while maintaining the highest safety standards.

Prepositioned and Ready to Respond, Anytime, Anywhere

Our strategically positioned response equipment and aerial dispersants are ready to be deployed from our global Tier 1, 2, and 3 bases anytime, anywhere, by land, air or sea.

NRC's experts and fully trained response technicians are ready to respond with everything they need including all of the required travel credentials.

Global Industrial and HAZMAT Response Solutions

Already the largest provider of commercial environmental and industrial services, NRC is the only truly global, end-to-end spill and high hazard response solution provider. Our world renowned High Hazard Emergency response experts are highly trained and ready to respond anywhere you need them to manage any spill or incident involving compressed gasses, toxic chemicals, organics, biologics and WMD.

NRC will also provide custom high hazard response units, for use by our people or yours, in ports, rail yards, industrial facilities and airports. We can also provide customized expert training and design and fabricate equipment specific to your needs.

A Single Source Global Provider Offering a Full Spectrum of Environmental, HAZMAT, Industrial and Emergency Response Solutions

You Are a Customer, Not a Member

At NRC, we're focused solely on your needs as a customer, not as member of a cooperative, where the control is primarily in the hands of the largest members while more cost is distributed among members who may not want or need all of the additional assets or coverage.

Complete Customized Coverage

Our Global Response Services are tailored to your business. Our experienced global response experts will conduct a thorough assessment of your operational requirements and provide a customized program tailored specifically to meet those requirements.

Pay Only for the Assets you Need

NRC has the global expertise to meet your environmental and industrial needs, maintain readiness, and respond anywhere in the world to manage and mitigate any situation. This single provider with experienced global capability eliminates the need to belong to cooperatives and pay more for excessive capabilities.

Lower, More Predictable Costs

Because your program is based solely on your needs, the cost can be significantly lower than coverage provided in member shared programs. Your costs are fixed, completely predictable year-to-year, and scalable based on your volume.

From Response to Remediation, NRC Provides an End-to-End Program Based on Your Operational Needs

The Right Assets

Based on your individual environmental, industrial and emergency response requirements, NRC's logistics team will design customized response equipment and dispersant packages that are locally appropriate, strategically pre-positioned, and ready to deploy.

The Right People

Our world renowned in-house experts, supported by a highly skilled Independent Contractor Network, form the nucleus of a fully trained and well-equipped response team with the expertise and experience to respond, mitigate, and remediate any situation.

The Right Solution

NRC's Global Response Services provide a right-sized, expertly staffed, fully compliant readiness and response capability at significant savings versus member based providers.

A Time Tested And Proven Global Response Capability

- Over 20 Years of Experience and 1000+ Spills Remediated
- Supported by a Global network of 1250+ Personnel
- Trusted by 7000+ Customers Worldwide

Efficient & Cost Effective Solution

All of the Services You Need From a Proven Single Source Provider

A Faster More Predictable Response

Pre-staged equipment stockpiles and strategically positioned Tier 1, Tier 2, and Tier 3 response resources enable NRC to mount a rapid and effective response to any environmental incident.

Experts and Assets Tailored to Your Needs

NRC will tailor a response program including all the expertise and specialized equipment necessary to meet your response need.

Our global network of 1000+ experts, ready to respond 24/7/365, include On Scene Commanders, Incident Managers, Beach Masters and Aerial Surveillance Specialist. Trained responders and High Hazard Emergency technicians complete the team and work at the ground level to perform the necessary tasks of assessing, mitigating and remediating the issues, backed by logistical support teams that ensure the necessary equipment and personnel are deployed where needed.

NRC puts a diverse range of response resources to work for clients by moving personnel and equipment where and when needed. Our global resources include offshore containment and recovery systems and aerial dispersant assets, as well as fortified resources to respond to shoreline or land based incidents.

When an event occurs, NRC activates the closest resources. We can also cascade additional resources if required and serve as the central client contact, coordinating and deploying equipment and personnel where needed.

The Only Tier Three Global Coverage Solution Provider

Our U.S. National OSRO designation and strategically placed assets and independent contractors enable us to meet your spill requirements anywhere in the USA. International Tier 3 response bases are strategically placed in the USA, UK and UAE stocked with pre-identified HVLP, Shoreline and Offshore equipment ready to deploy to any global emergency including flyaway packages on scheduled or chartered aircraft or sealift packages for less immediate response incidents. Our HAZMAT Team can be airborne within hours wherever you may need them. Our Aerial dispersant program includes pre-positioned aircraft in France, Amsterdam, Florida, Louisiana and California along with dispersant stockpiles strategically located in Scotland, France, Dubai and the USA. **At NRC, we are truly the world’s first and foremost Global Response Solution.**
