

Manufacturing

Description

Manufacturing sites are complex requiring strict compliance to quality, health and safety standards and regulations. NRC provides a diverse array of waste management, site remediation, and industrial cleaning services to the industrial manufacturing industry. We provide comprehensive environmental services to the pharmaceutical, biotechnology, manufacturing, and chemical industries.

Our personnel are highly experienced in the handling of a wide array of liquid and solid waste. This includes fuels, acids, virgin and waste solvents, and various manufacturing chemicals. Through the use of innovative, state-of-the-art techniques, NRC has a proven track record of successfully managing potentially dangerous and/or costly on-site obstacles, including limited access, sensitive ongoing operations, excessive depth and structural integrity.

Our goal is to support the integrity, safety and reliability of our clients' activities and operations. NRC provides expert and technical solutions to ensure that projects meet all quality and performance requirements, while minimizing the environmental impact.
