

Oil and Gas

Description

NRC has been a trusted provider of comprehensive, cost-effective and safety driven solutions to the oil and gas industry for 25 years. NRC is a proven single-source provider of oil spill, high hazard emergency response, environmental, industrial, firefighting, rescue, and consultancy and training services to oil and gas operators around the world.

The world's largest commercial Oil Spill Response Organization, with the broadest offering of global service to over 7000 customers, NRC has a proven track record of delivering end-to-end preparedness, response, and remediation solutions even under the most challenging conditions.

NRC puts a diverse range of response resources to work for clients by moving personnel and equipment where and when needed. Our global network of 1000+ experts currently operating in 13 countries are ready to respond 24/7/365. Specialized response teams and equipment is rapidly mobilized to address customers' environmental, industrial, or emergency response requirements. NRC will also tailor a response programs to meet client's unique operating environment. Our in-house experts can design and deliver customized equipment packages for ports, terminals, and oil & gas exploration and production activities worldwide.

We cover approximately 700 assorted offshore and onshore facilities, refineries and pipelines and provide emergency and environmental services to more than 15,000 tank and non-tank vessels, and an additional 2,000 barges.

Our experienced response teams are in the forefront of managing catastrophic events and absolutely committed to providing cost effective solutions that meet our customer's environmental needs and regulatory obligations, while maintaining the highest safety standards.
