A MESSAGE FROM LOU C

On October 18, 2018 we became a publicly traded company on the New York Stock Exchange under the symbol NRCG. So what's the difference you may ask? It does come with its own set of challenges. There are significant additional financial reporting requirements on a quarterly and annually with hard deadlines that have to be met. Our financial team has put in countless hours preparing these reports, which is an ongoing process. We are somewhat subject to the fickleness of the public market. Some of this is under our control, and some is not. Time has proven though, that well managed companies that communicate consistently and meet their forecast do well, and that is certainly under our control. In January, we held our 4th Annual National Meeting in Tampa, FL. At this meeting, we laid out our growth strategy for this and coming years. There is much to be excited about, much of which is contained within the pages of this newsletter. We also have an Emergency Response Program. This is within our control.
