

NRC Newsletter Q2 2016

Description

NRC Newsletter Q2 2016

In this edition of NRC's quarterly newsletter, you'll find information on three of our new recruits: Evgeni Shevchenko, Doug Nowak and Ray Ramsey. There are also project spotlights from NRC Alaska and Compliance alongside some of our notable project awards. You'll also find recent employee sporting achievements from NRC Turkey, the Sureclean Sprinters and much more!

A message from Lou O'Brien

At NRC, we are continuing our focus to provide our customers with expert global solutions over a wider array of services. Our purchase of ENPRO Services, Inc. on April 21, 2016 adds significantly to that ability by increasing our U.S. domestic footprint and expanding our full line of environmental services.

The addition of ENPRO to our company means we have increased our national footprint with an additional 11 facilities including two Part B waste treatment, storage and disposal facilities ("TSD") and increased our service capabilities with the addition of explosive deflagging to our already broad range of service capabilities.

With the acquisition of ENPRO, NRC has increased our employee numbers to a global team of 1,250 personnel. We have built a solid reputation as a market leader employing industry experts in many of our service lines, and adding process technology to our diverse offering. We are excited to move forward with our strong workforce, enabling us to provide our environmental, industrial, and emergency response solutions safely and to the highest standard.

Over the past few months we have completed many successful projects throughout our global operations. Inside this newsletter you'll be able to read some project spotlights and notable project wins across the various regions and continents we work in. There are also some articles on company achievements, client innovation tips, recent conferences, and much more!

Enjoy the read and as ever, feel free to reach out to me at Lou@nrc.com.
